

Energy Saver Fluorescent Tubes

LED Fluorescent Tubes have the same installation method as traditional ones. For the same brightness they have higher luminous efficiency compared to traditional fluorescent tubes. In addition, an LED fluorescent lamp consumes only 30-40% of electric energy compared to ones. LED Fluorescent Tubes also have a long service time of up to 50,000 hrs.

T8 12W and 18W light-concentrating LED fluorescent lamps can replace traditional 40W and 40W fluorescent lamps. They are featured with compact circuit design, up to 98% luminous efficiency.

Product Features:

1. Using specially made and super bright LEDs as light sources.
2. Built-in power supply, low working voltage and current result in high reliability and stability.
3. Low Lumens depreciation at 10% / 10K hrs and long life span of 50k hrs.
4. Easy installation, maintenance-free and environmentally friendly.
5. Housing Material: Aluminium Alloy
6. Beam Angle: 120°.
7. IP Rate: 44
8. CE, ROHS and UL certificates

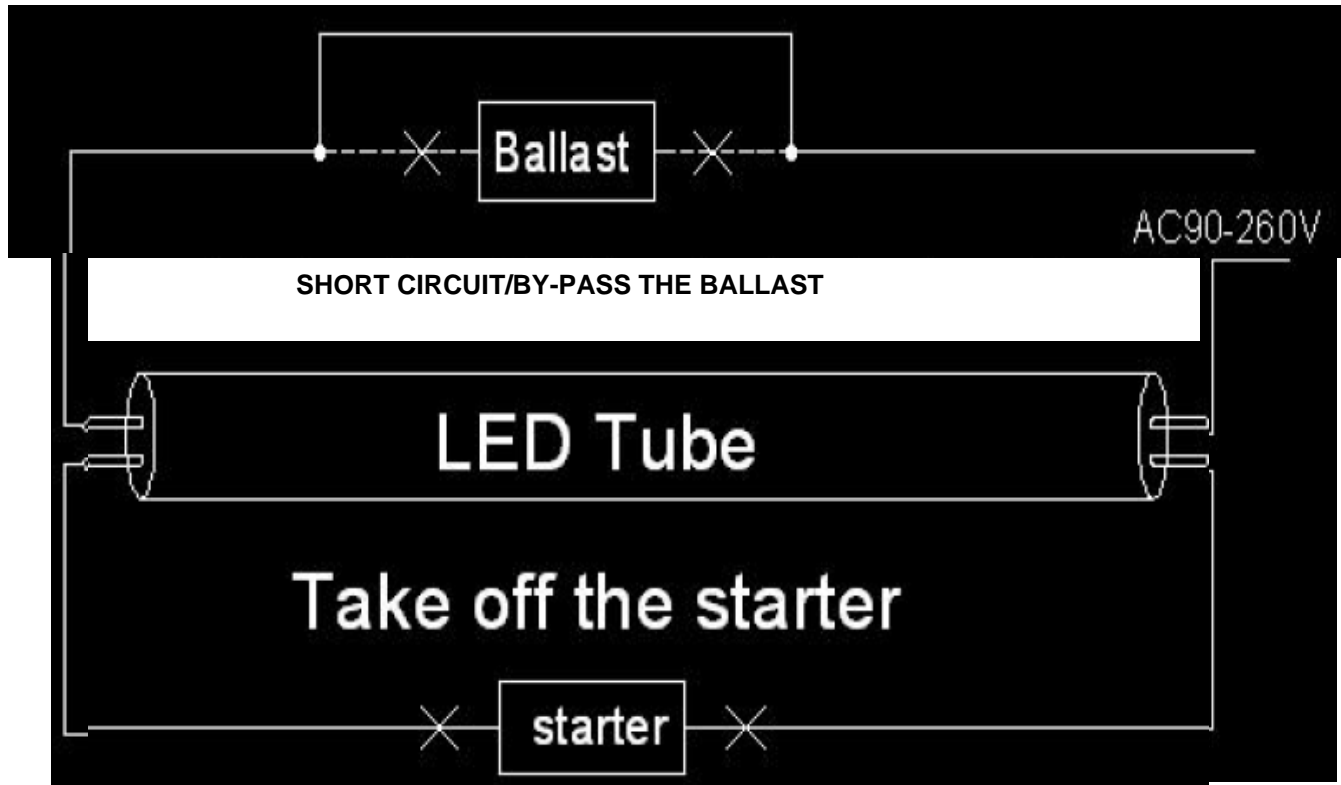

ITEM NO.	LED Qty	Working Voltage(V)	Luminance (lm)	Power (W)	Kevin	Size(mm)
T5-55cm	112	AC120/230 50~60HZ	560	7	6500K 4200K 3300K	Φ16×549
